

## Lauderhill Transit Center Project Summary

Broward County Transit, Lauderhill Transit  
Center, Lauderhill, Florida

December 2021

## Project Summary

---

In 2021, Broward County Transit commissioned NANOV DISPLAY INC to provide several real-time passenger information digital displays for their new Lauderhill Transit Center opening in Lauderhill, Florida.

The transit center sits on 1.5 acres of land next to Lauderhill Mall and houses 10 bus bays, a security office, and two platforms. It serves approximately 8000 passengers daily.

For the Lauderhill project, NANOV manufactured, deployed, and installed several 55" outdoor, single-sided, real-time passenger information digital signs (PIDS) to all 10 bus bays and 5 walls within the transit center.

The project was a success due to NANOV's ability to customize its digital sign enclosures and mounting brackets in order to accommodate the varying pre-existing structures of the Lauderhill Transit Center.

The Lauderhill Transit Center was opened successfully on December 21, 2021.
