

Brightline Project Summary

Brightline, Boca Raton Station,
Boca Raton, Florida

December 2022

Project Summary

Brightline is an intercity railroad that runs between Miami and West Palm Beach, Florida, privately owned and operated by Florida East Coast Industries (FECI).

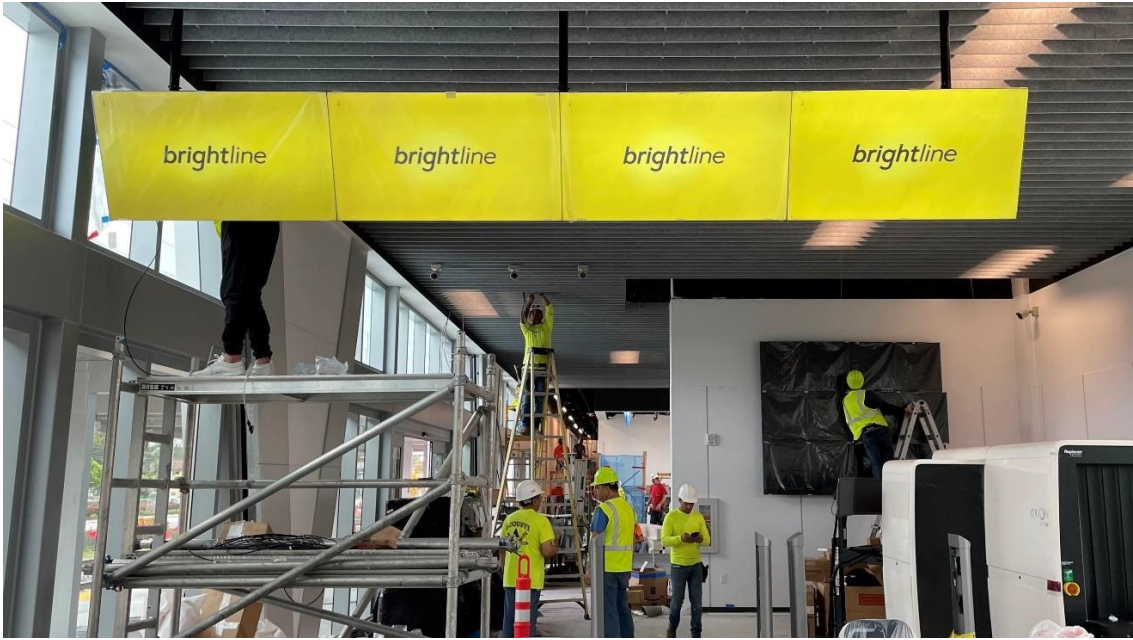

In 2022, FECI commissioned NANOV DISPLAY INC to provide several digital signage solutions for Brightline's new station opening in Boca Raton, Florida. NANOV manufactured, deployed, and installed all digital signage screens for the construction of the Boca Raton Station in Florida, including but not limited to:

- 1X4 Videowall – Overhead Security Entrance
- 2X4 Videowall – Smart Lounge Wall
- 2X4 Videowall – Select Lounge Area
- 3X2 Videowall – Wall Behind Security Checkpoint
- 3X2 Videowall – Wall in Smart Lounge
- 98" Digital Information Display – Restroom Corridor
- 55" Outdoor Double-Sided Kiosk – Station Entrance

The Brightline project was a success due to the efficient coordination of resources from NANOV and the effective collaboration between NANOV's and Brightline's engineering teams. The new Boca Raton station successfully opened on December 21, 2022.

Brightline has since been helping local communities in Florida access high-quality passenger rail as a transportation option, improving and expanding America's rail network. An extension of the railroad from West Palm Beach to Orlando International Airport is expected to open fall 2023.
